-----

Comprehensive database of wind energy projects with detailed information on capacity, turbines, and locations.

Map of wind farm power plants in the US, Europe, Asia, Africa & Australia. Search and share locations.

The United States Wind Turbine Database (USWTDB) provides the locations of land-based and offshore wind turbines in the United States, corresponding wind project information, and turbine technical ...

Also includes information on each country's actual yearly production of wind-generated electricity, as well as the amount of electricy generated in offshore wind farms as compared on onshore farms.

The Global Wind Atlas is a free, web-based application developed to help policymakers, planners, and investors identify high-wind areas for wind power generation virtually anywhere in the world, and then ...

The best wind generation US map illustrates the potential and existing wind energy resources across the United States. This map highlights areas with high wind speeds, making them ...

The Global Wind Power Tracker (GWPT) is a worldwide dataset of utility-scale, on and offshore wind facilities. It includes wind farm phases with capacities of 10 megawatts (MW) or more.

Find maps and charts showing wind energy data and trends.

Interactive map of wind farms in the US. View the largest projects, track new developments, and explore capacity data across all states.
