Which data centers are covered by Saudi Arabia data center facilities analysis?

This report covers the Saudi Arabia data center facilities analysis, which will provide the following information on the colocation data centers: Locations covered: Al Ahsa, Al Khobar, Al Qassim, Dammam, Jeddah, Medina, Neom, Riyadh. Interested in this Report?

How big is Saudi Arabia's data center capacity?

Saudi Arabia's data center capacity is expected to expand nearly eightfold, increasing from an existing capacity of over 300 MW to more than 2.7 GW in the coming years. In 2025, most investments were led by Center3, DAMAC Digital, Sahayeb Data Centers, and Mobily.

What is the future of data center infrastructure in Saudi Arabia?

Increasing investments in artificial intelligence (AI) and cloud services drive robust data center infrastructure demand. The AI market in Saudi Arabia is expected to grow at a compound annual growth rate (CAGR) of 29% until 2030, while annual spending on public cloud services is projected to grow at a CAGR of 23% until 2029.

Does Saudi Arabia need a data center?

Power is the single most critical factor for data centers, and Saudi Arabia is making it a centerpiece of its strategy. The Kingdom already has significant fossil fuel-based generation capacity, but the long-term plan hinges on renewable energy, particularly solar.
