How do I choose the best solar panels for my home?

The best solar panels for you are going to be the ones that fit your energy goals and budget. There are also many factors you'll have to consider before moving forward with your installation, including the size of your roof and the energy consumption of your home.

Which solar panel is best for home use?

This way, you can get the best price for your new system. Which type of solar panel is best for home use? Generally speaking, monocrystalline panels are the best option for home use. However, polycrystalline and thin-film panels can be good options depending on the size of the system and other factors specific to you.

What is the most popular brand in residential solar?

Qcells is the most popular brand in residential solar thanks to quality equipment and pricing. SolarReviews statistics show that 58% of solar installers offered Qcells panels in the past year, but changes in the competitive landscape kept it at the 3rd place spot on our list.

How efficient are residential solar panels?

Almost none of the residential solar panels installed in 2007 were 20% or more efficient. In 2022, almost 80% exceeded that mark, according to the Berkeley Lab. The most efficient residential solar panel on the market comes from Moxon and has a maximum efficiency rating of 24.1%. Efficiency also comes into play elsewhere in a solar panel system.
