The integration of a 60 MWp photovoltaic park perfectly complements the existing wind power facility and allows us to develop the first hybrid renewable energy park in Romania.

The Iron Gates project represents Korkia's entry into Romania's rapidly evolving renewable energy market, combining solar, wind, and battery storage in a single hybrid energy park.

Simtel, listed on the Bucharest Stock Exchange, has signed a EUR19.1 million contract with VERBUND Wind Power Romania for the design and construction of a 60 MWp photovoltaic park in ...

Discover the collaboration between Simtel and VERBUND to construct a 60 MWp photovoltaic park in Casimcea, Romania, enhancing hybrid renewable energy.

The hybridization of the existing wind park is one of the most significant hybrid renewable projects currently underway in Romania and marks a key milestone in the country's energy transition.

"We are thrilled to be involved in an initiative that represents a major step forward for Romania's renewable energy sector, being one of the largest hybrid photovoltaic and battery storage ...

The Casimcea project demonstrates the practical application of hybrid renewable energy technology, where solar and wind generation are integrated into a single operational platform to ...

Research, investment, and policy pivotal for future energy demands. The review comprehensively examines hybrid renewable energy systems that combine solar and wind energy ...
