Recent legislative changes in Bulgaria aim to facilitate the permitting process for solar power plants. The report provides a complete picture of the market situation, dynamics, current issues and future prospects.

This guide explores system types, government incentives, and cost-saving strategies while highlighting the latest industry trends. Whether you're planning a rooftop installation or a utility-scale project, learn how to ...

Solar power in Bulgaria was expanded by 100 megawatts (MW) in 2011. A 16.2 MW solar power plant in Zdravetz, Bulgaria was expected to be completed in June 2012, with power being sold for \$0.30/ kWh in a ...

Bulgaria's government outlines plans for renewable energy, yet lacks concrete strategies for rooftop solar installations despite the country's high solar potential. While a draft strategy exists, it lacks support for ...

The power plant is on track to become operational early next year. A 123 MW system will be on 400 hectares between the villages of Knizhovnik and Dolno Vojvodino in Haskovo.

Bulgaria installed over 1 GW of solar for the third consecutive year in 2025 and is forecast to add over 2 GW this year thanks to a large pipeline of utility-scale projects. Bulgaria added...

Bulgaria's solar sector added 1.4 GW in 2025 and is poised for a record 2 GW+ in 2026, driven by competitive projects and BESS integration, though high eco-taxes pose a challenge.

A high share of solar and wind power indicates significant progress in decarbonization, but excessive curtailment--where renewable electricity is wasted due to grid constraints or insufficient flexibility--signals ...

Are you looking for information on renewable energy in Bulgaria? In this CMS Expert Guide, we tell you everything about it.

Solar power generated 12% of Bulgaria's electricity in 2023. By the end of 2020 about 1 GW of solar PV had been installed. It has been estimated that there is potential for at least another 4 GW by 2030. By the end of 2024 about 3.9 GW of solar had been installed. On March 13, 2023, peak photovoltaics power was 30% of Bulgaria electricity gener...

Most distributed solar PV projects currently being built in Bulgaria are being configured purely for self-consumption; in other words, they are not connected to the grid, and are being used strictly to reduce the
