---

Developer Acciona Energia will add a gigawatt-hour-scale battery energy storage system (BESS) at an existing solar PV plant in Chile.

With transmission lines at overcapacity and permitting delays slowing the development of new grid infrastructure, battery energy storage systems (BESS) have surged as a profitable ...

Chile's first battery energy storage projects were commissioned in 2009, and all but two of its 16 administrative regions have facilities in operation, under construction or in the planning stage.

Spanish company Acciona Energ&#237;a has announced the construction of a 200 MW/1,000 MWh battery energy storage system (BESS) in Chile's Atacama Desert. The project will be colocated ...

Developer Atlas Renewable Energy has inaugurated the 800 MWh battery energy storage system (BESS) plant in Mar&#237;a Elena commune, in the Antofagasta region.

Chile has emerged as a world leader in hybrid systems and standalone energy storage since implementing its Renewable Energy Storage and Electromobility Act in 2022.

Acciona Energia's decision to retrofit their Chilean solar plant with a massive 1GWh battery system isn't just another project announcement--it's a glimpse into how rapidly the energy ...

The Quillagua solar-plus-storage installation, located in Chile's Antofagasta region, is a 221-MW solar photovoltaic plant with 1.2 GWh of battery energy storage.

Scheduled for commissioning in early 2027, the project will be among the largest battery energy storage installations in Latin America, reinforcing Chile's position as a regional leader in ...
