New utility-scale renewable and PMGE assets in Chile (most of which are distributed solar plants smaller than 9 MW) will likely all have storage components moving forward.

The Desert BESS Project, developed by Atlas Renewable Energy, stands as the first large-scale, stand-alone battery energy storage system in both Chile and Latin America. With transmission lines at overcapacity and ...

Grenergy Renovables, an independent renewable energy company based in Spain, is delivering the world's largest hybrid solar and battery storage project, Oasis de Atacama, in northern ...

Chile has an operational installed capacity of approximately 1GW in batteries, and another 3GW is under construction. Battery storage has been largely financed by bank lending in recent years, but we ...

Chile's first battery energy storage projects were commissioned in 2009, and all but two of its 16 administrative regions have facilities in operation, under construction or in the planning stage.

The bulk of BESS announcements in Chile concern new installations, most of them solar-plus-storage sites although some standalone battery storage projects do exist.

The financing will be used towards the deployment of 269MW solar PV generation capacity and 1.1GWh of battery energy storage systems (BESS), at Gabriela, the fourth phase of ...

The SCF is providing Technical Assistance to a large-scale Battery Energy Storage System (BESS) in northern Chile's Antofagasta region to address solar energy curtailment and improve grid stability.

November 24, 2025 - Enel Chile, through its subsidiary Enel Green Power Chile, has initiated construction of the Las Salinas battery energy storage system (BESS), part of an industrial-scale ...

Chile solar container battery source factory

In a landmark event held in the Region of Antofagasta, Chilean President Gabriel Boric led the inauguration of the BESS Coya, Latin America's largest solar battery storage system.
