The 480MW CEME1 PV Solar Power Plant in Chile began commercial operation in May 2024. This is approximately 2 years since its construction began back on Oct 5, 2021.

The project represents a total investment of US\$629 million and will add 509 MW / 2,036 MWh storage capacity to the country's largest solar plant, and will be contracted to Codelco, the ...

Analysis, reports, news and interviews about your industry in English, Spanish and Portuguese. Around half of planned capacity, or 2.98GW, corresponds to Antofagasta region, ...

Multinational assurance and risk management provider DNV has helped renewable energy leader Zelestra secure close to \$300 million to channel towards the development of a ...

PowerChina has finished building a 480 MW solar plant in the Atacama Desert in northern Chile, which is recognized for having the world's highest solar radiation levels.

Construction of the solar thermal electric plant commenced in 2014 and the plant was scheduled to begin operating in the second quarter of 2017, but got delayed significantly.

Officially commencing commercial operations in July this year, the project is a major milestone in Chile's efforts to promote energy transition and achieve its carbon neutrality goals.

An Executive Analysis of Turnkey Manufacturing Concepts and Technical Insights provided by J.v.G. Technology GmbH.

Its 480 MW capacity makes CEME1 one of the largest solar projects in Latin America and positions Chile as a leader in renewable energy development. The project's construction created ...

Recognized for its superior product reliability and extensive experience in supplying PV projects in desert
