China's solar energy production is reaching simply staggering levels, dragging energy costs down around the globe.

China's solar generating capacity is expected to surpass coal for the first time this year, according to the country's top electricity industry group, marking a milestone in the country's...

Shares of Chinese solar panel makers surged after a team of staff sent by Elon Musk had reportedly visited several photovoltaic suppliers in China.

Depending on solar concentration modes, commercially applied CSP systems can be classified into four main types, namely, solar tower systems, parabolic trough CSP systems, linear Fresnel CSP ...

China installed a record 315 GW (AC) of new solar capacity in 2025, lifting cumulative installed PV capacity to 1.2 TW and pushing non-fossil power sources past thermal generation for the ...

Explore China's massive solar megaprojects. Learn how gigawatt-scale photovoltaic farms in remote regions are reshaping the global energy landscape.

CTG has long dedicated itself to developing clean energy sources like hydropower, wind, and solar. In 2022, it contributed over 360 billion kWh of clean energy to society, striving to help China achieve its ...

China's solar sector advances with CSP tower completion, international project growth, and market resilience.

China Solar Power Group Ltd is a Hong Kong-based company that specializes in developing renewable projects, particularly in the solar sector. The company has been in operation since 2006 and has ...

The growth of solar power industries worldwide has been rapidly accelerated by the growth of the solar market in China. Chinese-produced photovoltaic cells have made the construction of new solar ...

China Solar Power Group

OverviewSolar photovoltaicsHistorySolar resourcesConcentrated solar powerSolar water heatingEffects on the global solar power industryGovernment incentivesAs of at least 2024, China has one third of the world's installed solar panel capacity and is the largest domestic market for solar panels. A large part of the solar power capacity installed in China is in the form of large PV power plants in the west of the country, an area much less populated than the eastern part but with better solar resources and available land.
