The power plant, which started operating in January 2021, has become one of the largest photovoltaic power stations in the country.

Solar energy will be key for Hungary to become a carbon-neutral country by 2050. China National Machinery Import and Export Corporation (CMC) inaugurated a 100Mw solar park on May 27, the largest in Central ...

The Kaposvar power project has opened a new chapter in China-Hungarian cooperation and marked Genertec-CMC Europe's re-entry into the European market and its foray into the field of new energy.

Hungary inaugurated the country's largest solar power plant, which was built by China National Machinery Import and Export Corporation (CMC) near the southwestern city of Kaposvar.

Hungary and China are joining forces to construct one of Central and Eastern Europe's largest solar energy storage facilities. The aim is to double Hungary's energy storage capacity and boost the role of ...

Chinese battery and car manufacturers settling in Hungary can build about 2-2.5 gigawatts of solar power plant capacity. The government's updated energy strategy calculates a total of 6 gigawatts of ...

Since 2015, combined installed capacity of solar power stations in the country has risen significantly to 129 MW, with installed capacity expected to continue its increase by 59 MW on average ...

After the grid-connected operation, it can generate 130 million kwh of electricity every year, save 45,000 tons of standard coal, reduce carbon dioxide emissions by 120,000 tons, and significantly improve ...

Hungary's largest solar energy project is underway, in collaboration with Huawei. The contract was signed in February, with MAVIR Ltd. as the investor.

China solar powered generator in Hungary

CMC Kaposvar Solar PV Park is a ground-mounted solar project. The project generates 150,000MWh electricity and supplies enough clean energy to power 35,000 households, offsetting 140,000t ...
