---

From remote mining camps to vital telecom infrastructure, Congo's outdoor energy storage market is powering sustainable development. By combining solar generation with smart storage, businesses ...

This article explores the rural electrification challenge, provides an overview of solar mini-grid technology, highlights key companies and notable projects, discusses government policies and ...

Our study focuses on Nuru, a privately owned Congolese energy supplier that has recently taken aim at expanding electricity access in eastern DRC using decentralized solar mini grids with ...

Hydro and solar powered mini-grids have the largest potential to accelerate electrification rates. The DRC has 100GW of hydro potential (the greatest in Africa), of which only 2.5GW have been developed.

PEZor aims to install 19 micro-hydro plants and 257 solar mini-grids, lighting 40,000 homes and key mines. Discover timelines, funding partners and local impact.

NURU develops and operates commercially-viable isolated solar-hybrid "metrogrids" (utility-scale urban mini-grids) that provide reliable, affordable and clean energy in the Eastern region of the Democratic ...

In several Goma neighbourhoods where almost nobody had electricity just five years ago, a small solar network is offering a flicker of hope despite widespread poverty and the city's violent ...

A solar minigrid in a Goma neighborhood where almost everyone lacked access to electricity just five years ago is offering a flicker of hope despite widespread poverty and the city's violent takeover by ...
