Cuba is set to deploy 1,312 solar-powered water pumps, each with a 10-kilowatt (kW) capacity, as part of its effort to transform its energy landscape.

As part of the plan, 1,312 drinking water pumping equipment with less than 10 kilowatts of power will be replaced by photovoltaic cells, which will benefit 793,287 inhabitants and save 14.8...

The report explains that the equipment will be installed in selected locations in the provinces of Sancti Spiritus and Granma, and in the Company for the Conservation of the Zapata Swamp, in Matanzas.

MADRID, Spain.- The Cuban government will implement a project to install solar electric pumps in agricultural areas, financed by the FAO and the Global Environment Facility.

Havana, Feb 27 (ACN) The Cuban potable water system is increasingly using solar energy water pumps as part of the country's program to progressively change the national energy matrix.

In the Cuban province of Las Tunas, a solar program is aiming to provide photovoltaic energy to 106 water pumps in the rural community of Cruce de San Joaquin, Majibacoa municipality.

El proyecto destaca el compromiso de Cuba con la transición hacia prácticas agrícolas sostenibles, con la meta de no solo satisfacer la demanda alimentaria, sino también de asegurar la protección de los valiosos ...

Electrobombas solares para suministrar agua a plantaciones agrícolas y animales serán instaladas en Cuba, con colaboración internacional, así lo reportan medios de la isla.

Micro Solar Water Pumps (MSWPs) are designed to provide smallholder farmers with affordable and sustainable irrigation solutions. These pumps typically have a capacity of 0.5 to 3 horsepower and are suitable for small ...

Cuba Micro Solar Pump

The innovative system consists of replacing pumping equipment with less than 10 kilowatts of power with a renovating technique that uses solar energy, which means a contribution in saving electricity, does not ...
