Bloom Energy has hired Morgan Stanley and Merrill Lynch veteran Aaron Hoover as head of business and corporate development. Among Hoover's key responsibilities: Develop and ...

DOE resources span the entire power system, from new generation and storage technologies to enhancing and expanding the transmission system to maximizing efficiency and ...

Borrowing and evolving technologies from the data center industry can help energy storage experts prepare for the future. --Aaron Craig is the senior director of Vertical Growth at nVent.

Energy-efficient AI, battery storage systems, and renewed interest in nuclear have reshaped how data centers generate, consume, and manage energy.

The data center energy storage landscape is rapidly evolving, shaped by shifting priorities, emerging technologies, and growing AI demands. Industry professionals cite power ...

The comprehensive exploration covers the basics of data centers, the need for reliable backup systems, and the multifaceted challenges encountered by data center storage solutions.

Despite the benefits, the integration of energy storage in data centers faces some hurdles. The risk of upfront capital costs is a hurdle--despite the steady decline in battery prices.

This whitepaper explores the critical role of data centers in the digital economy and the innovative potential of thermal energy storage (TES) systems to enhance their efficiency, resilience, and ...

It's an exciting time for innovation in the energy storage industry and, as technology evolves, it is absolutely essential that we avoid the temptation to source cheaper, short-term options ...

By combining data center expansion with clean energy initiatives, this collaboration sets a powerful example

Data center energy storage aaron

of industries aligning to address global energy challenges.
