From steppe to power source, China's wind energy sector is revolutionizing the country's electricity supply and taking on a global leadership role. With its vast landmasses in the north and an...

Data and information about Wind power plants and their location plotted on an interactive map of China.

With a total investment of 15 billion yuan, the project will establish a new production line for 8 to 15 MW offshore wind turbines, targeting an annual production capacity of 150-200 sets of wind power ...

The project is part of China's efforts to expand its renewable energy capacity, particularly in offshore wind power. It aligns with national goals to reduce carbon emissions and increase the...

The massive growth in wind and solar begs the question: why is China still building coal power plants and, by most analyses, way more than it actually needs? The answer is complicated.

The Namaacha Wind Power Station, is a 120 megawatts (160,000 hp) wind-powered electricity power station under construction in Mozambique is the first grid-ready wind energy

Fengxian Offshore Wind Farm (Fengxian Offshore Wind Farm Phase II) consists of 32 turbines with 6.45MW nameplate capacity. The project construction is expected to commence from ...

To access additional data, including an interactive map of global wind farms, a downloadable dataset, and summary data, please visit the Global Wind Power Tracker on the Global Energy Monitor website.

Since 2010, more than half of all new wind power was added outside the traditional markets of Europe and North America, mainly driven by the continuing boom in China and India.

Shanghai has approved the Fengxian 1# offshore photovoltaic project, the first commercial-scale solar-wind hybrid of its kind in China. The move marks a major step forward in the ...
