This reliable pond fish feeder consists of a light reflector with two bulbs and a spinning, bug-whacking set of nylon rods. The light is supported and extended outwards two-feet by a swing-arm.

The 110V Bug Light Fish Feeder is a smart addition to any pond or lake setup. It draws flying insects using a specialized light and instantly delivers them to waiting fish below.

Have you seen the pond bug zappers that are like string weed wackers? It's just a light to attract the bugs with a spinning string in front of the light. You suspend it over the pond and it wacks the bugs ...

The Bo-Jo Fish Light is an excellent device to attract bream, crappie, bass and more. It works great on large lakes and equally well or even better on small ponds and lakes, where feeding fish can have a ...

This bug light fish feeder can do just that. A fluorescent light attracts all types of bugs, then a high-speed fan disables them and knocks them into the water to feed your fish.

Upgrade your pond, fountain, or water feature with our solar-powered pond lights. Easily install these weatherproof, submersible lights for a touch of ambiance.

The Bug Light Fish Feeder attracts insects with gentle light, feeding your fish naturally while creating an engaging nighttime spectacle. Low-cost, plug-and-play design makes feeding effortless.

Want to feed your fish for only pennies a day? Our new bug light fish feeder can do just that. A fluorescent light attracts all types of bugs, then a high-speed fan disables them and knocks them into ...
