This article lists the largest electricity generating stations in the United States in terms of installed electrical capacity. Non-renewable power stations are those that run on coal, fuel oils, nuclear, natural gas, oil shale, and peat, while renewable power stations run on fuel sources such as biomass, geothermal heat, hydro, solar energy, solar heat, tides, waves, and the wind.

Electricity generation, 2025 Total electricity generated in each country or region, measured in terawatt-hours.

Current Capacity The largest fuel source is natural gas, accounting for just under 43% of all generation capacity. Coal, with a share of 15%, represents the second largest source of generation capacity. ...

The analysis includes the 238 utilities that: (i) reported DR capability to EIA in 2022, (ii) reported peak demand of at least 100 MW, and (iii) are investor-owned, municipal, cooperative, state, or federal ...

The American Public Power Association presents its annual report on current and imminent electricity generation capacity in the United States by types of fuel, region, and ownership.

Our annual report on electricity generation capacity in the United States breaks down the current and imminent generation of electricity by type of fuel, location, and ownership type.

Find statistics on electric power plants, capacity, generation, fuel consumption, sales, prices and customers.

Table 3.4.A. Net generation by energy source: Commercial sector Available formats:XLS Table 3.4.B. Net Generation from renewable sources: Commercial sector Available formats:XLS ...

List of largest power stations in the United States Map of all utility-scale power plants This article lists the largest electricity generating stations in the United States in terms of installed electrical capacity.

Five major power generation and collection capacities

Global electricity generation by source, 2014-2027 - Chart and data by the International Energy Agency.

To help frame expectations on what power sources will likely be in play over the coming years, the U.S. Energy Information Administration (EIA) issues decade-out projections on generation...
