This accomplishment, reached on Monday, sets a new world record and marks a significant breakthrough in the pursuit of fusion power ...

The Experimental Advanced Superconducting Tokamak (EAST), dubbed China's "artificial sun," maintained a steady-state high-confinement plasma operation for a remarkable 1,066 seconds on ...

The ultimate goal of developing an artificial sun is to replicate the nuclear fusion processes that occur in the sun, providing humanity with a limitless and clean energy source, and ...

Shandong Province Jining Weishan Fucunzhen "Front Runner" solar farm is an operating solar photovoltaic (PV) farm in Fucun Town, Weishan, Jining, Shandong, China.

This project highlights Taiwan's commitment to scaling floating solar technology as part of its renewable transition. By leveraging reservoirs, it demonstrates a strategic approach to ...

What follows are the top 10 solar power plants that are actually operational and verifiably producing power as of 2025. No speculative or half-built megaprojects and planned expansions. ...

Renewable power generation projects list for students, engineers and researchers. Our researchers constantly research and bring you updated lists of renewable power generation projects using solar, ...

This accomplishment, reached on Monday, sets a new world record and marks a significant breakthrough in the pursuit of fusion power generation.

SEIA Members: Access the searchable database The Major Solar Projects List is a database of all ground-mounted solar projects, 1 MW and above, that are either operating, under construction or ...
