An Automatic Lithium Battery Assembly Line is an integrated, high-tech manufacturing system designed to automate the entire process of assembling Li-ion battery packs.

JOT Automation's industry-leading battery assembly solution is a fully complete, turnkey solution for battery assembly that is also EV battery compatible. Highlights include automated unpacking of ...

For cell/module pack assembly, PIA Automation offers flexible and highly automated systems for the efficient production of battery cells, modules, and battery packs. These systems are scalable, ...

Prismatic Aluminum Battery Module Assembly Line is engineered for high-precision, high-output manufacturing of energy storage battery packs. With a scalable architecture and fully integrated ...

Smartphones, laptops, and wearable devices require compact, high-quality batteries. Automated assembly lines enable precise stacking and sealing of small cells, ensuring reliability and...

Build high-quality lithium battery packs with automated production equipment, complete process development, on-site installation, and lifetime technical support.

This state-of-the-art production line achieves seamless automated battery pack production. Spanning an impressive 16 meters, it integrates cutting-edge technology through the following equipment.

Advanced lithium battery assembly using automated production lines delivers precision, scalability, and cost savings critical for meeting surging global demand. These systems integrate ...

Automated production of lithium-ion, saltwater and solid-state batteries. Stacking/laser welding of cell modules and end-of-line (EoL) testing technology.

Fully automatic assembly of tool lithium batteries

The Automated Coin Cell Assembly System (CAAS) integrates a high-precision robotic arm, machine-vision inspection, and auto-sealing to achieve rapid, precision assembly of coin-type lithium batteries ...
