-----

We develop battery modules, racks and energy storage systems designed to power industrial applications across challenging sectors, including construction, maritime, defence, and grid systems.

Solar: with dramatically falling solar and battery storage costs, and abundant solar resources in The Gambia, competitively procured solar-with-storage IPPs offer The Gambia an excellent opportunity to ...

The objective of the project HA-G1048 is to maximize the use of the energy produced by the 8-MWp solar photovoltaic plant (SPP) to further reduce the use of thermal power, by implementing a Battery ...

The Gambia energy storage project subsidy demonstrates how targeted financial incentives can accelerate renewable adoption. As battery costs decline and policy support grows, such models will ...

Through the Gambia Renewable Energy Fund, The Government commits to mobilizing resources to provide CAPEX subsidies to the identified mini-grid sites and adopt innovative financing strategies to ...

The project aims to increase the generation, transmission and distribution capacity and to support an on-grid and off-grid PV/battery systems installation, operation and maintenance for schools and health ...

The Gambia energy storage project subsidy demonstrates how targeted financial incentives can accelerate renewable adoption. As battery costs decline and policy support grows, such ...

The Soma Solar Power Station is a planned 150 megawatts solar power plant in Gambia. The two lead developers of this renewable energy infrastructure are the Government of Gambia and ...

It is designed not only to enhance energy generation capacity but also to introduce robust battery storage to stabilize and optimize electricity distribution across the country.
