We design and build container generator units, shipping container power units, and modular generator housing that meet the highest standards of safety and performance.

Our Tier 4 containerized generators are high-powered --500 kW to 1250 kW-- units packaged in 30-foot or 48-foot ISO containers.

Our containerized generator enclosures are known for their supreme quality, appearance, and durability. We custom build to our customers specifications up to 3MW.

Our generator containers for Type 2, 3, and 4 gas engines have a standard 40-foot length. Width and height depend on engine type, the application (power generation only or CHP) and ambient conditions. Customized ...

From standard ISO containers to acoustic generator enclosures, our experienced Caterpillar engineers will work with you to design a custom, assembled enclosure for your diesel or gas generator set.

Packaged container and enclosure options provide alternatives to installations in existing or new buildings. We have significant experience with pre-packaged container and enclosure solutions for engine-generator sets, ...

AltaStream designs and delivers fully customized generator packaging solutions for industrial, utility, and energy applications. Whether containerized or skid mounted, our enclosures are engineered for structural integrity, ...

The Containerized Generator is a power generator that is packaged and delivered as a complete unit within a container. This containerized approach offers benefits such as mobility, easy deployment, and scalability.

Our containerized generator enclosures offer unmatched flexibility, durability, and customization options, making them the ideal solution for housing and protecting your valuable generator equipment.
