# Ghana energy storage for electric vehicles

The policy seeks to create an enabling environment for electric vehicle adoption, aligned with the National Energy Transition Plan (2022-2070) and Ghana's international climate commitments.

Officially commissioned on June 25, 2025, by the Minister for Energy and Green Transition, John Abdulai Jinapor, the station combines renewable solar energy with lithium-ion battery storage and a grid ...

"Ghana currently has about 17,000 electric vehicles, the highest number in Africa. If we do not act proactively, these vehicles alone could place a heavy demand on our electricity supply.
