The Global Wind Power Tracker (GWPT) is a worldwide dataset of utility-scale, on and offshore wind facilities. It includes wind farm phases with capacities of 10 megawatts (MW) or more.

The Global Offshore Wind Report 2025 provides a comprehensive overview of the offshore wind industry's performance last year and outlines the pathway to accelerated growth.

Discover upcoming top offshore wind farm projects in the world, driving renewable energy growth, and combating climate change.

Section 1 Tokyo 100-6611 Let's work together to make offshore wind one of the world's leading . ar offshore wind community, In 2023, 25 new offshore wind farms with a total capacity of 9.8 gigawatts (GW) were taken into ...

As of the date of publication, the global operational offshore wind capacity stands at 85.2GW with a further 27.3GW undergoing offshore construction. China makes up just above 50% of global commissioned ...

Wind farm projects are taking shape both onshore and offshore all over the world. These projects are being scaled up to unprecedented sizes, pushing the boundaries of renewable energy technologies.

The Global Wind Energy Council (GWEC) projects that offshore wind capacity will almost triple between 2024 and 2030, increasing from 83 GW to 238 GW. Despite this rapid growth, many countries are ...

The offshore wind industry is navigating challenges such as rising capital costs, supply chain constraints, and policy uncertainties in key markets. The 2025 Global Offshore Wind Report highlights ...

In this article, we'll explore some of the most exciting offshore wind power projects to watch in 2025--projects that are set to redefine energy infrastructure and help countries meet their climate goals.

Global offshore wind power storage projects

Our report finds that there is now already 83 GW of offshore wind installed worldwide, keeping the lights on for 73 million households, and powering countries' economic development. There is currently a ...
