Shuai Guan | IEEE Xplore Author Details. Affiliation. Foshan Power Supply Bureau, Guangdong Power Grid Co., Ltd., Foshan, China. Publication Topics.

Under the global climate change and energy crisis, solar energy has become the focus of research, development, and utilization throughout the world. Therefore, an empirical study on the awareness of ...

China has significantly increased its coal power capacity, reviving concerns about its climate-changing carbon emissions.

We proposed a new integrated self-powered generator by combining the hollow sections at the top and middle of the generator with a multilayer selective solar absorber and a hierarchically ...

Shuai Guan was born in 1998. He received the Bachelor of Engineering degree from the School of Electrical Engineering, Shenyang Engineering College, China, in 2022, where he is currently ...

Affiliations: [Liaoning Key Laboratory of Power Grid Energy Conservation and Control, Shenyang Institute of Engineering, Shenyang, China].

Shuai Guan The HK Polytechnic University, PhD student Verified email at connect.polyu.hk high entropy alloys microstructure mechanical properties

The massive growth in wind and solar begs the question: why is China still building coal power plants and, by most analyses, way more than it actually needs? The answer is complicated.

Located off the coast of Fengxian district on the northern shore of Hangzhou Bay, the project forms part of Shanghai's broader strategy to integrate offshore wind and solar energy. It will ...

The world's first gigawatt-scale offshore solar power project was successfully connected to the grid and has

Guan Shuai Solar Power Generation

begun power generation on Wednesday, its operator CHN
