Some common synonyms of extract are educe, elicit, evoke, and extort. While all these words mean "to draw out something hidden, latent, or reserved," extract implies the use of force or pressure in ...

EXTRACT definition: to get, pull, or draw out, usually with special effort, skill, or force. See examples of extract used in a sentence.

With the dramatic increase of photovoltaic (PV) module installation in solar energy-based industries, the methods for recovering waste solar generators should be ...

Different recycling processes for silicon-based modules have been reported over the past two decades, which in general combine two of these methods in different stages: mechanical, ...

An extract from a book or piece of writing is a small part of it that is printed or published separately.

An extract (essence) is a substance made by extracting a part of a raw material, often by using a solvent such as ethanol, oil or water. Extracts may be sold as tinctures or absolutes or dried and powdered.

10. a solid, viscid, or liquid substance containing the essence or active substance of a food, plant, or drug in concentrated form: beef extract; vanilla extract.

To address this, a robust recycling strategy is essential to recover valuable metal resources from end-of-life PVs, promoting resource reuse, circular economy principles, and ...

Extract forms a kind of mirror image of abstract: more common as a verb, but also used as a noun and adjective. The adjective, meaning "derived or descended," is now obsolete, as is a sense of the noun ...

This study innovatively explored the sustainable recovery and utilization of raw materials from discarded solar

How to extract silica from waste photovoltaic panels

panels, focusing on the transformation of recycled silicon into microporous silica ...

Silicon (Si) has long been recognized as the primary material in photovoltaic devices due to its excellent electrical properties and abundance. In this work, we provide a comprehensive review ...

EXTRACT meaning: 1. to remove or take out something: 2. to make someone give you something when they do not want.... Learn more.

This paper demonstrated a facile, efficient, environmentally friendly, and viable wet chemical process for recycling EoL solar panel waste and upcycling the recovered silicon with 3N+ ...

Abstract This work proposes an integrated process flowsheet for the recovery of pure crystalline Si and Ag from end of life (EoL) Si photovoltaic (PV) panels consisting of a primary ...

Therefore, an efficient method for recycling disposed photovoltaic panel is required to decrease environmental pollution. This work is aimed at efficiently recovering pure silicon and other ...
