Rubber seal strips are critical for maintaining the operational stability of solar panel systems. They protect against moisture, dust, and other environmental factors that could compromise energy efficiency and ...

The objective of this research is to minimize dust accumulation on PV panels operating street light posts, in order to maximize the time between successive maintenance and reduce the maintenance costs.

The methodology is built around two central questions, which are (1) What are the impacts of dust on PV panels, and (2) What are the techniques used to mitigate, and clean, dust accumulation on PV ...
