Powered by nickel-zinc battery technology, the BC Series was designed for data centers that demand a safe, reliable, and sustainable way to manage rapid, repeated power surges.

Increase availability and resiliency of your critical power infrastructure. The Galaxy Lithium-ion Battery Cabinets for 3-phase UPSs are sustainable, innovative energy storage solutions for data centres, ...

These precision tools ensure your uninterruptible power supply battery system remains responsive, efficient, and aligned with your broader operational goals--whether for manufacturing, data centres, ...

Our new Solition Data Center energy storage system boasts intelligent features, which culminate in safety and reliability, longevity, space savings and easy-to-manage maintenance.

PowerPlus Energy provides high-quality rack cabinets for lithium battery storage. Streamline and secure your energy system with our efficient and reliable cabinet solutions.

Designed for both small branch offices and enterprise data centers, these intelligent cabinets ensure your critical systems operate in a secure, clean environment with protection from physical intrusion ...

Discover the intelligent design and versatile capabilities of our Battery Cabinets. With their compact footprint and robust functionality, these cabinets are essential for any setting that demands efficient ...

Co-locating battery storage with data centres in the NEM is a strategic infrastructure move that leverages falling battery costs to unlock energy savings, operational resilience, and ...

Based on Li-ion battery technology, the system supports the mix of new and used batteries and includes a three-level battery management system (BMS). These qualities ensure an intelligent battery ...

Intelligent Battery Cabinets for Australian Data Centers

The Schneider Electric™ exclusive Galaxy Lithium-ion Battery Cabinets for 3-phase UPSs are innovative energy storage solutions for data centers, industrial processes, and critical infrastructures.
