Is there a global competition in photovoltaic technologies?

However, the pattern of global competition in photovoltaic technologies is yet to be revealed. Based on the global PV patenting data from 1970 to 2018, this paper reveals the network structure of international PV technological competition and further explores the competing relations between regions and nations.

What is the competition structure of a global PV technology network?

The number of nodes, competitive relations, and total competition intensity have increased significantly, making competition between countries more intense and complicated. The global PV technological competition network corresponds to an ideal core-periphery structure, with competition dominated mainly by a few core countries.

How does technological competition affect the PV industry?

The technological competition is reflected not only in the R&D race for similar technologies but also in the competition for control of overseas technology markets. This provides a different perspective for studying international competition in the PV industry.

How does photovoltaic patenting affect global competition?

Photovoltaic patenting has formed a pattern of global competition with increasing intensity. Competition at the regional level is strongly related to Europe. National competitiveness is geographically uneven and temporally dynamic. Photovoltaic technological competition may lead to intensifying geopolitical tensions.

Competitive Landscape of China's Photovoltaic Racking Industry China's photovoltaic mounting industry is highly competitive, with relatively low market concentration and a large number ...

Inventory of the competition landscape of photovoltaic brackets How big is the global PV market? After a year of market stabilization, preliminary reported market data shows a global annual PV market at a ...

Photovoltaic Bracket Market Overview The Photovoltaic Bracket Market size was valued at USD 928.3 million in 2025 and is expected to reach USD 2195.41 million by 2034, growing at a ...

China Business Intelligence Network News: Photovoltaic brackets are evolving from traditional fixed brackets

Inventory of the competition landscape of photovoltaic brackets

to tracking brackets, and the penetration rate of tracking brackets in the ...

Discover the booming global photovoltaic bracket market! This in-depth analysis reveals a \$5 billion market in 2025 projected to reach \$15 billion by 2033, driven by renewable energy adoption ...

The competitive landscape of the Photovoltaic Bracket Market offers a comprehensive analysis of key players. It includes insights such as company overviews, financial performance, revenue generation, ...

The Photovoltaic (PV) Bracket Market is a critical component of the solar energy value chain, facilitating the secure and efficient mounting of solar panels across diverse installation sites.

The global photovoltaic bracket market size was valued at approximately USD 2.5 billion in 2023 and is projected to reach around USD 4.8 billion by 2032, growing at a compound annual growth rate ...

The Photovoltaic Bracket market size, estimations, and forecasts are provided in terms of output/shipments (K Units) and revenue (\$ millions), considering 2024 as the base year, with history ...

This paper constructs a global photovoltaic technological competition network based on patents from 1970 to 2018 to capture the international competitive dynamics at multiple scales. The ...
