The JK-PB2A16S20P supports 7S to 16S LiFePO4 battery packs with a voltage range of 0-100V and 200A continuous current. Check your battery's specifications to ensure compatibility with this inverter ...

I've done the same. I used 840 -18650 cells to build a 7s 316ah battery. It is work but fun too. I built a welder from a car battery a timer and a solenoid. Now I have to buy the inverter. Have fun!!!

At launch, the IQ Battery 10C/10CS-based system is NOT compatible with third-party inverters and legacy Enphase microinverters through the load/PV control accessory.

7S LiPo batteries built with seven cells in series providing 25.9v. All MaxAmps LiPo pouch batteries are assembled in the USA.

Different battery types with different strings need to match different BMS. The following is the information of Daly BMS 3S, 4S, 7S, and 10S.

One option is to have your hybrid inverter/charger handle low and high voltage cutoffs, and then you just need to activate balance the cells. Charge to max 54v or less rather than 58v, ...

What Is a 7S LiPo Battery (25.9V) and Why Use It? A 7S LiPo battery provides a high-voltage platform that reduces current for the same power, improving efficiency and thermal headroom on power ...

If you want the battery to be fully charged in 8hours of direct sunlight, then you'd need an array capable of

Inverter 7s battery

close to 4kWh to account for inefficiencies and such.
