I introduce solar panels adapted from the Starship Depot that PEKKA had made. Mod as well as stand-alone part available here: <https://github.com/tylerraiz/Fu...>

This pack contains various solar panels that I've sourced from spacecraft concepts. They range from small concentrated solar panels to massive blanket solar arrays.

These components are required for the mod to function and are bundled as part of any download: To install, place the GameData folder inside your Kerbal Space Program folder. If asked to overwrite files, please do so.
