-----  
Are lithium-ion battery prices falling?

According to BloombergNEF's 2025 Lithium-Ion Battery Price Survey, lithium-ion battery pack prices have fallen 8% since 2024, reaching a record low of \$108 per kilowatt-hour.

How much does a lithium ion battery cost per kWh?

1 All prices do not include sales tax. The account requires an annual contract and will renew after one year to the regular list price. The cost of lithium-ion batteries per kWh decreased by 20 percent between 2023 and 2024. Lithium-ion battery price was about 115 U.S. dollars per kWh in 202.

How much does a lithium iron phosphate battery cost?

The price of Lithium Iron Phosphate (LFP) battery cells for stationary energy storage applications has dropped to around \$40/kWh in Chinese domestic markets as of November 2025. These cells are further integrated into battery enclosures, which house 5-6 MWh of cells in 20-foot containers.

Why did lithium-ion prices drop 8% in 2025?

BloombergNEF's 2025 survey finds average lithium-ion pack prices dropped 8% to \$108/kWh, driven by LFP adoption, overcapacity, and competition. Stationary storage costs plunged 45%, EV packs averaged \$99/kWh, with China leading lowest prices.

The cost of lithium-ion batteries per kWh decreased by 20 percent between 2023 and 2024. Lithium-ion battery price was about 115 U.S. dollars per kWh in 202.

Discover the latest lithium battery energy storage prices and industry trends in 2024. This guide breaks down cost factors, regional pricing variations, and application-specific solutions to help businesses ...

Lithium-ion battery cell prices by chemistry Average price of battery cells per kilowatt-hour in US dollars, not adjusted for inflation. The data includes an annual average and quarterly average ...

The price of Lithium Iron Phosphate (LFP) battery cells for stationary energy storage applications has dropped to around \$40/kWh in Chinese domestic markets as of November 2025.

# Latest price of lithium energy storage batteries

Lithium metal price trend analysis with weekly real time pricing forecasts, outlook, market trends, historical data and spot prices.

BloombergNEF's 2025 survey finds average lithium-ion pack prices dropped 8% to \$108/kWh, driven by LFP adoption, overcapacity, and competition. Stationary storage costs plunged ...

New York, December 9, 2025 - lithium-ion battery pack prices have dropped 8% since 2024 to a record low of \$108 per kilowatt-hour, according to latest analysis by research provider BloombergNEF ...

According to BNEF, battery pack prices for stationary storage fell to \$70/kWh in 2025, a 45% decrease from 2024. This represents the steepest decline among all lithium-ion battery use ...

Lithium prices corrected sharply, driven by a speculative unwind following a recent rally. Markets are reconsidering the magnitude of near-term demand, as slowing passenger EV growth ...

Lithium-ion battery pack prices fell to a record \$108/kWh in 2025, fueled by LFP adoption and global competition.
