Accurate weather and power forecasts to reduce risks, cut losses and boost renewable energy performance. Start using our powerful API today.

Watch live while our E.W. Brown Solar Facility generates power. Learn more about its capabilities. Access comprehensive historical generation data.

Comprehensive data summaries, comparisons, analysis, and projections integrated across all energy sources. Monthly and yearly energy forecasts, analysis of energy topics, financial analysis, ...

Live Power provides real-time power generation and transmission data for better insights into power markets.

High-frequency live solar data and PV power data keep your control room ahead of changing conditions. Solcast Live streams "estimated actuals" for every point on Earth, covering the last seven days and ...

Welcome to our Daily Live Solar Power Generation stream, where you can watch real-time solar energy production directly from the system.

Welcome, PVOutput is a free service for sharing and comparing PV output data. If you own a solar system please contribute your power output readings. Remember me Forgot Password?

The Global Solar Power Tracker is composed of worldwide facility-level data on utility-scale (1 MW+) solar photovoltaic (PV) and solar thermal facilities, as well as country-aggregated distributed (&lt;1 ...

Real-time data from NESO showing the generation mix and forecasted demand for the GB transmission network. Data is downloaded via the Elexon Insights API. Demand (negative values) ...

At the same time, renewable power generation was steadily rising. Great Britain's exposed position in the north-east Atlantic makes it one of the best locations in the world for wind power, and the shallow ...
