According to the regulations promulgated in March 2025, all new solar and wind power projects must be equipped with battery systems equivalent to 30% of their installed capacity, with a ...

Based on a comparative policy analysis between Mexico, the US and Germany, this paper seeks to provide policy recommendations to incentivise the deployment of energy storage ...

Mexico has positioned itself as a regional leader in energy storage policy with the introduction of groundbreaking regulations that mandate battery storage integration for renewable ...

The year 2026 marks an inflection point for Mexico's energy sector. New secondary regulations are reshaping how distributed generation interacts with the grid, redefining net-metering mechanisms, ...

The plan targets the addition of 24,954 MW of new clean capacity by 2030, with 5,000 MW dedicated to battery energy storage systems (BESS) to manage the intermittency of solar and ...

The report highlights Mexico's introduction of the region's first regulation requiring all solar and wind power plants to install battery systems equivalent to 30% of their installed capacity, ...

Mexico's new regulation mandating battery systems for solar and wind projects positions it as a model for energy storage integration in Latin America, according to a new report.

Recently, the Mexican Ministry of Energy announced a new regulation mandating that all newly built wind and solar PV projects must be equipped with energy storage systems accounting for ...

Mexico's new 30% battery storage mandate is set to transform the renewable energy sector. Learn how this policy impacts grid stability, private investment, and the future of energy ...

By combining specific regulations, a storage mandate for new renewable projects, and long-term planning,

Mexico s solar energy storage policy

Mexico is emerging - according to OLADE - as a regional benchmark for energy ...
