You're telling me that some engineer designed the layout of that solar farm, designed it to have growing plants under the panels, but never thought about mowing?!? Whoops!

Professor Joshua Pearce collaborated with professional sheep-raiser Rafael Lara on a study that shows the profitability of "solar" sheep, raised specifically to trim grass and weeds under ...

Maintaining your solar lawn is crucial for minimizing risks. Learn how NARDAC provides insurance coverage for renewable energy projects.

Tall grass or weeds can impede access to the panels for maintenance and cleaning. Additionally, they can trap moisture and debris, leading to potential damage or reduced performance. Regular mowing ...

This guide will look at the importance of regularly mowing the area around your solar panels and why the GreenTec Barrier Mower is the perfect solution for this challenging task.

Raymo's low-profile design allows the mower to cut grass and control vegetation even in the tight spaces beneath solar panels. Unlike traditional mowers or heavy machinery, Raymo offers a safe and ...

Integrating vegetation management into solar farm operations can have numerous benefits. By mowing and maintaining the land surrounding solar panels, developers can create a synergistic relationship ...

Solar farms can even use sheep to trim grass around and under panels without damaging equipment. Solar grazing can promote biodiversity and supplement traditional mowing as a cost-saving measure.

We are at a solar field using a 4520 Tractor and Tough Cut to mow the grass down between panels. Maintaining solar fields is simple because the grass just needs to be cut down to prevent it from ...

Mowing the grass under the photovoltaic panels

To date, the most common plans for vegetation management under solar arrays are mechanical control (mowing), grazing sheep, and pollinator habitat, or a combination of these three.

Existing Site ConditionsPre-Construction ActionsPlant Species SelectionPost-Construction ConsiderationsTo date, the most common plans for vegetation management under solar arrays are mechanical control (mowing), grazing sheep, and pollinator habitat, or a combination of these three. In almost every scenario a mixture of different plant species will provide more desirable outcomes than a monoculture. Mixtures provide diversity in growth habits with a...
