Solar panels are a long-term investment in energy efficiency, but they can face a hidden threat - pest problems. From squirrels to birds, critters find the cozy space beneath your panels a ...

Mugwort produces different mental effects than hops when present in beer. Several of my friends and I have noticed this while drinking this beer. It seems to elicit almost a sense of glee. Of ...

With intense heat and long sunny days, June is the best time to solarize. Solarizing is a powerful way to make wholesale, non-chemical progress on tough invaders like mugwort and other ...

I recently made a beer with yarrow, mugwort and dandelion root. I played around a bit with the tea and found that leaving it to steep longer did seem to increase the perceived bitterness, but also increased ...

A very common artemisia around much of the world is the weed "mugwort"; artemisia vulgaris. Not as strong as wormwood, was used in pre hops beers, and is still used for a variety of ...

A significant increase in late season biomass was also observed for areas under the PV panels (90% more biomass), and areas under PV panels were significantly more water

What type of beer is it going to be? Mugwort is potent, so don't overdo it, especially if you're using hops as well. If I were to use the two, I would probably use mugwort as the bittering ...

So I was ordering some things from northern brewer last night and I noticed they had wormwood for sale, so I said to myself why not and ordered an oz. I also picked up some stuff called ...

Mugwort and wormwood contain Thujon, but according to what I have read, the amount you can get by fermenting it is too low to have a real effect on you. I believe that, wormwood is so ...

When an animal builds a nest under the solar array - or sticks and leaves simply blow in and accumulate - the

Mugwort under photovoltaic panels

As the photovoltaic (PV) industry continues to evolve, advancements in Photovoltaic panels planted with mugwort have become critical to optimizing the utilization of renewable energy sources.

Lichen growth on solar panels can reduce their efficiency by blocking sunlight and potentially causing long-term damage to the panels. Removing lichen requires careful attention to avoid damaging the ...

From Mugwort to Meadow Presented by Lydia Pan for the 2020 CIPWG Virtual Symposium October 7, 2020
Solarization: Use of a clear plastic cover to kill weeds using the sun's ...

A few weeks later I foraged wild mugwort, added 3 g to 1 litre of water taken off a rolling boil and steeped for 5 minutes. This infusion was incredibly weak. A gentle bitterness appeared after ...

Whether you have a garden growing under your panels or overgrown trees surrounding your grid, controlling vegetation around your solar installations will prevent damage. Set a routine ...
