The U.S. Large-Scale Solar Photovoltaic Database provides the locations and array boundaries of U.S. photovoltaic facilities, with capacity of 1 megawatt or more.

Developers added 12 gigawatts (GW) of new utility-scale solar electric generating capacity in the United States during the first half of 2025, and they plan to add another 21 GW in the ...

China's total installed power capacity is forecast to reach about 4.3 terawatts by the end of 2026 as China expects 300 GW to come from primarily wind and solar.

This report presents a performance analysis of 75 solar photovoltaic (PV) systems installed at federal sites, conducted by the Federal Energy Management Program (FEMP) with support from National ...

With hundreds of megawatts of experience and proven track record in diverse and complex markets, National Solar is uniquely positioned to provide sustainable projects that benefit the communities we ...

Top biggest solar PV stations in the United States 2024. PV parks, PV farms. (Updated September 2024) Get familiar with our list of the largest US-based solar photovoltaic plants with a capacity ...

Concentrating solar power (CSP) projects in United States are listed below alphabetical by project name. You can browse a project profile by clicking on the project name. You can also access ...

The United States is home to a number of large solar power plants. The Copper Mountain project, for example, is one of the nation's first utility-scale solar plants.

Solar Resource Maps and Data Find and download resource map images and data for North America, the contiguous United States, Canada, Mexico, and Central America. Solar Supply ...

National Photovoltaic Solar Power Station

Most are individual photovoltaic power stations, but some are groups of co-located plants owned by different independent power producers and with separate transformer connections to the grid.
