This comprehensive guide will walk you through everything you need to know about rooftop solar power, from understanding the technology to calculating your potential savings and ...

Search for a city, state, or zip code to see solar potential and impact across entire geographic areas. We currently have solar data for portions of 50 states and Washington DC.

The project evaluates both theoretical solar availability (GHI) and practical energy output (PVOUT), helping to visualize which rooftops may be most suitable for solar photovoltaic systems.

We offer commercial and residential solar services in New York and New Jersey. In addition to the highest quality solar service, we also provide free energy services and efficiency evaluations. Check ...

Uses local climate data, your roof measurements, current local electric rates and current solar system cost to generate an accurate solar cost and savings estimate, customized for your home.

NY SOLAR MAP estimates rooftop and ground mount solar electric potential (PV panels) and connects you to local solar resources.

Interactive and User-Friendly: Navigate through our easy-to-use interface to find solar installations near you. Click on markers to get detailed information about each location, including capacity, installation ...

Gain a holistic view of the solar installed in New York State. Discover installed capacity, number of projects, and annual trends for completed projects through aggregated data from NYSERDA, NYS ...

Find an Installer Near Me - Link with certified local solar installers to install or upgrade your home's solar energy system. Click for more information »

Nearby rooftop solar photovoltaic power generation

In 2024, DCAS assessed all City-owned buildings larger than 10,000 gross square feet for solar readiness and identified nearly 29 MW of rooftop solar potential. As of 2024, the Clean Energy ...
