The Dutch government announced the results of the SWiM subsidy (Hydrogen Cluster Sustainable Mobility), which allocated the funds, in September. The subsidy supports the ...

New hydrogen refueling stations will be built in Meerkerk, Steenwijk, Hattemerbroek, and Woerden. In four other municipalities, refueling stations will be expanded to include a refueling option ...

HyNetherlands aims to develop, build, and operate one of the first large-scale industrial value chains in Europe for the production and delivery of renewable-based hydrogen in the Northern Netherlands (Province of ...

Plug Power announced it has started installation of its 5-MW electrolyzer for the H2 Hollandia project, the first decentralized green hydrogen hub initiative currently under construction in ...

Welcome to the most up-to-date map of hydrogen projects in the Netherlands. Discover how our hydrogen market is developing in the future. Together we will make the Netherlands the Hydrogen ...

Eleven new projects involving large-scale electrolyzers have been launched in the Netherlands, with about 602 MW of subsidized electrolyzer capacity. Refineries, chemical industries and gas stations can ...

By the end of 2027, more hydrogen filling stations will be added in the Netherlands. There will also be an additional 192 heavy vehicles, 10 passenger vans and 9 small hydrogen ...

Find out all about the network of Hydrogen refueling stations in Netherlands. Learn about its development, distribution and benefits.

The use of hydrogen as a raw material and fuel can reduce industrial emissions and contribute to achieving the climate goals. The hydrogen network will connect our largest industrial regions to each ...

Netherlands hydrogen energy station 372kWh

All hydrogen filling stations in the Netherlands have been mapped, with their properties. For example, refuelling options at 350 and 700 bar (30 MPa and 70 MPa) and stations have different capacities ...
