For instance, the new vertical-axis wind turbines can operate efficiently at lower wind speeds. A study by the National Renewable Energy ...

Older wind turbine technologies were necessary steps forward but fell short in many ways. This next generation of wind power designs promises to ...

The Aeroleaf [®] is a patented micro wind turbine composed of a double blade with a vertical axis in the form of a leaf and a synchronous micro-generator with ...

These startups develop new wind energy technologies such as Airborne wind energy, floating offshore wind turbines, vertical-axis turbines, wind ...

Wind power just got a major upgrade, and it could blow into a town near you soon. German company Nordex has unveiled a cutting-edge wind ...

Modern wind turbines are increasingly cost-effective and more reliable, and have scaled up in size to multi-megawatt power ratings. Since 1999, the average turbine generating capacity has increased, ...

POTENTIAL APPLICATIONS Since our devices are low maintenance and harmless to wildlife (like solar panels), they open new horizons for wind energy in urban areas and protected areas.

An offshore wind farm off the coast of Virginia is on track for completion in 2026, featuring 176 turbines that will power up to 660,000 homes ...

Engineers have developed and refined several unorthodox designs for generating wind energy. From multiple blades to no blades at all, here are ...

The development of a new wind generator can be very useful if it is able to emulate the features that have

New wind power generators

made photovoltaics the main energy source in the distributed energy sector. In relation to large-scale wind power, ...

A new form of wind energy is under development that promises more consistent power and lower deployment costs by adapting the design of a ...

Eco-friendly bladeless small wind energy. Startup technology Vortex wind power for on-site generation, the low-cost wind turbine which is not a turbine!

With seven innovative wind turbine technologies of 2024 on the horizon, the domain of renewable energy is experiencing a significant shift. From ...
