We made iridium oxide coated titanium anodes in the shape of rod, strip, disc, plate, mesh, wire, tube or combinations and or assemblies (customized)

Its nanostructural design reduces iridium usage to 0.5 mg/cm², while intelligent manufacturing enables predictive maintenance, driving efficient development of the hydrogen energy ...

As more and more manufacturers use titanium in solar panel manufacturing, efficiency will increase and prices will continue to decrease. This ...

We are presently looking for a vendor to plate iridium oxide on our titanium anodes. We plan to convert all our platinum anodes to Iridium oxide coated Titanium anodes.

Dimensionally stable anodes for cathodic protection applications.

Iridium tantalum oxide coated are considered the optimum choice as anodes in various industries for their strong corrosion resistance in acid environments, low overpotential for oxygen evolution, great ...

Wstitanium is a custom manufacturer with an excellent reputation in the field of iridium-tantalum coated titanium anode manufacturing. We use unique formulas and advanced coating technology to provide ...

As more and more manufacturers use titanium in solar panel manufacturing, efficiency will increase and prices will continue to decrease. This could mark an important tipping point in the ...

The combination of low overpotential and high current efficiency makes iridium coated titanium plate anodes particularly attractive for large-scale industrial applications where energy costs ...

Our offers a wide range of long-lasting iridium tantalum coated titanium anodes with excellent durability,

Photovoltaic factory iridium titanium plate

stable operational performance, remarkable energy efficiency and minimum plant ...

Welcome to Hele Titanium, where you'll find advanced iridium-tantalum coated electrodes known for durability and stable performance. Our DSAs offer exceptional energy efficiency and minimal ...
