-----

With a lightweight yet rugged build, it sets up in under five minutes by a single person and helps installers meet OSHA ladder safety standards. By reducing fatigue and increasing reliability on the ...

A pulley system is attached to the top of the ladder. A patented module "hook" attaches to the edge of a PV module frame and prevents lateral sliding of the module in the hook. An operator pulls the rope to ...

The Fluke PV Module Lift(TM) is designed to make solar panel installation faster, ...

Safely and easily lift solar panels to the roof with the ladder-pulley system. This compact and simple-to-operate module lift system eliminates the need for heavy lifting as well as minimizes damaging the ...

This innovative tool enables you to lift solar modules to the roof with ease and precision, making installation faster, safer, and more efficient. With its compact design and simple operation, Module ...

By reducing fatigue and increasing reliability on the job site, the PV Module Lift enhances productivity without compromising safety. Available with either a 60" or 80" rope, it's the smart choice for ...

The use of lifting pulleys in solar panel installation offers several advantages, such as increased efficiency, reduced labor costs, and enhanced safety. By providing a mechanical advantage, ...

The Module Lift is an economical system for getting PV modules onto a rooftop safely and quickly without damaging them. It is an additional Solmetric accessory, unrelated to PVA use. It uses your ...

The Solmetric Module Lift is designed to safely and quickly transport a PV module to a roof. The device uses your existing fiberglass Werner or Louisville extension ladder.

The Fluke PV Module Lift(TM) is designed to make solar panel installation faster, safer, and more efficient.
