In an age of finding creative ways to recycle end-of-life products, a Swiss startup is using retired wind turbine blades as solar panel support beams.

In Santander, at the Palacio de la Magdalena, Soleolico unveiled a pioneering wind turbine featuring photovoltaic panels on its rotating blades, harnessing both wind and solar power for ...

This unique technology combines the forces of wind and solar energy into a single system, making it the world's first wind turbine with photovoltaic panels integrated into its blades.

Use of solar panel as wind turbine blades. With populations increasing exponentially and our natural resources being strained by increases in demand, it is more important than ever to invest in ...

On October 6, 2023, energy company Soleolico unveiled the world's first wind turbine equipped with photovoltaic panels mounted on rotating blades, aptly named "sails.". This innovative...

On October 6th, at the Palacio de la Magdalena in Santander, energy company Soleolico introduced what it calls the world's first wind turbine with photovoltaic panels anchored on rotating...

Wind turbine blades have a reasonable surface area and extra power from solar panels mounted on them could easily be transmitted to the grid via existing wind farm infrastructure. But even so, the ...

A Swiss startup is using reclaimed wind turbine blades instead of metal beams as horizontal supports for solar panels. Founded in 2022, Turn2Sun is based in Neuchâtel and calls its ...

Renewable energy assets, particularly solar panels and wind turbine blades, were designed for durability and efficiency, not for easy recycling. The first wave of installations from the ...

Photovoltaic panels and wind turbine blades

With over 300,000 wind turbines installed worldwide, Swiss startup Turn2Sun uses recycled wind turbine blades as horizontal supports for solar panels instead of metal beams.
