Eco Wave Power will soon commence the installation of its third and fourth wave energy projects, in the Port of Los Angeles, and in Portugal.

Portugal saw them as an opportunity. Instead of building something completely new, engineers asked how these old systems could work together with modern energy sources, not ...

A 1MW wave energy installation in Portugal is a step closer to construction after engineers confirmed the site's favourable ocean conditions.

EDP Renewables, a leading global player in the development of wind and solar projects, has commissioned Portugal's second hybrid park that combines wind and solar energy in the same ...

Develop a dedicated strategy for energy research, development and demonstration that aligns policy design, implementation and funding with the achievement of Portugal's 2030 energy sector targets ...

Portugal is attracting multibillion-euro data center projects that promise jobs and growth -- but limited renewable power and rising environmental concerns threaten to derail the boom.

A one-megawatt (MW) wave energy installation planned for Portugal's northern coast has recently moved a step closer to construction after engineers confirmed favorable ocean conditions ...

At Galp's Sines Refinery in Portugal, Plug Power is supporting one of Europe's most significant industrial decarbonization efforts, delivering a 100 megawatt green hydrogen system ...

EDP Renewables, a leading global player in the development of wind and solar projects, has commissioned Portugal's second hybrid ...

In addition to its environmental impact, the project is expected to reduce the port's carbon footprint, create
