The Cambalache Power Plant in Arecibo, where Genera PR will install a 52-megawatt battery energy storage system to strengthen Puerto Rico's electric grid.

As more homes became "mini power plants", generating electricity from rooftop solar and storing it in batteries, the island's grid faced a new challenge: modernizing to manage a decentralized,...

Project Marahu will provide clean energy, lower generation costs, and enhance grid reliability for Puerto Rico through solar photovoltaic farms and battery energy storage systems.

Genera PR this week broke ground on a \$60 million Battery Energy Storage System (BESS) at the Cambalache Power Plant in Arecibo, marking the start of construction on the first of six ...

The Marahú project consists of two planned solar plus storage facilities, Salinas and Jobos, that will incorporate the most advanced solar and energy storage technologies.

Despite ongoing grid challenges, Puerto Rico leads the U.S. in per capita adoption of rooftop solar and residential battery storage. Building on this momentum, LUMA proposed a ...

Despite the progress in both distributed and utility-scale battery storage, the Puerto Rico Energy Bureau has approved a new, 560MW gas plant and the procurement of 3000MW of ...

Genera PR, the company operating the majority of Puerto Rico's energy generation resources, has begun construction on a 52MW battery energy storage system (BESS) at the ...

On Dec. 22, 2024, Puerto Rico's Governor Pedro Pierluisi announced the selection of Energiza to build and operate a new 478-MW power plant in San Juan. The plant will initially use liquefied natural gas ...

Puerto Rico Energy Storage Power Station

Tesla Megapacks are set to back a new energy storage facility in Puerto Rico, after officials from the territory's government and from the company met last week to sign a contract for the...
