How do I find a job in the photovoltaic field?

One of the simplest methods to find job offers in the photovoltaic field is to browse job postings on dedicated websites, such as Indeed, Jooble, or Subito. Each of these currently lists over a thousand national-level job offers, with high demand for roles like electricians, designers, and sales professionals.

Could 2024 be the first period of stagnation for solar jobs?

After years of rapid and unchallenged growth, 2024 could mark the first period of stagnation for jobs in the European photovoltaic (PV) sector. This is revealed in EU Solar Jobs, the annual report on solar employment produced by the SolarPower Europe association.

How many solar jobs are there in the EU?

According to the report, the vast majority of solar jobs are concentrated in the development phase of installations (design and construction), with nearly 715,000 workers in the EU, accounting for almost 87% of total jobs--an increase of three percentage points compared to 2022.

How many photovoltaic workers are there in Italy?

Currently, Italy ranks fourth in Europe for employment in the photovoltaic sector, with a total of 76,000 workers. Only Germany (154,000 direct and indirect jobs), Poland (113,000), and Spain (91,000) have more. What stands out at the national level is Italy's annual growth rate. In 2022, the Italian photovoltaic workforce counted 41,911 employees.

Illinois' CEJA (Climate and Equitable Jobs Act) includes funding for pre-apprenticeship and solar installer training hubs that prepare workers for long-term careers in renewable energy.

Talent Acquisition Business Partner, Lightsource by Connect with our solar and storage specialists We deliver tailored recruitment and global mobility solutions for the world's solar and storage leaders. ...

Check out our selection of solar energy news from all over the globe. All the top recent events in solar thermal and photovoltaic market. The latest research, innovative technologies, ...

As solar energy continues to expand globally, the demand for talent in solar recruitment is rapidly growing.

Recruitment of photovoltaic support workers latest news

The surge in solar energy jobs spans a wide range of roles, from manufacturing and ...

Explore the growing significance of solar installers in the global energy shift, the surge expected in 2025, and how businesses can meet evolving staffing demands.

Established recruitment, staffing and workforce solutions provider for the solar energy sector.

We support ground-mount photovoltaic farms, solar power plant commissioning and energy storage integration projects. We consistently place professionals capable of managing complex ...

“Back then, recruitment and job-seeking in the photovoltaic industry were booming. Although my job doesn't seem high-end, it felt promising, and the pay was decent.”

EU Solar Jobs 2024: All the Data on Jobs in the Photovoltaic Sector After years of rapid and unchallenged growth, 2024 could mark the first period of stagnation for jobs in the European ...

Solar industry expansion is racing ahead but shortages of skilled labor could derail progress. Long-term solutions are required to support further growth. **Benoit Ribeaud**, ...
