The Global Solar Atlas is an online tool that provides an overview of solar energy potential for a site or region.

Estimates the energy production and cost of energy of grid-connected photovoltaic (PV) energy systems throughout the world. It allows homeowners, small building owners, installers and manufacturers to ...

Explore the latest solar market insights and policy updates in all 50 states and Washington, D.C. All market data is current through Q3 2025. California leads as the top solar state. With over 54 GW of ...

Uses local climate data, your roof measurements, current local electric rates and current solar system cost to generate an accurate solar cost and savings estimate, customized for your home.

This map contains multiple layers showcasing solar infrastructure within the US. The map visualizes solar power plants, electric power transmission lines, and the photovoltaic (PV) ...

NASA POWER's Dependable Data Ensures Dependable Energy for U.S. Utility Company Reliable solar and weather data provides accurate performance monitoring for 360 community solar garden ...

Find and download solar resource map images and geospatial data for the United States and the Americas. For more information on NLR's solar resource data development, see the National Solar ...

Search for a city, state, or zip code to see solar potential and impact across entire geographic areas. We currently have solar data for portions of 50 states and Washington DC.

It is provided by the World Bank Group as a free service to governments, developers and the general public, and allows users to quickly obtain data and carry out a simple electricity output calculation for ...

2023 ATB data for residential solar photovoltaics (PV) are shown above, with a Base Year of 2021. The Base

Residential Solar Power Atlas

Year estimates rely on modeled capital expenditures (CAPEX) and operation and maintenance ...
