As a result, Slovenia announced a steady pipeline of new solar projects in recent months, ranging from a 9.9 MW solar power plant in Prapretno to a 3MW solar power plant at the Port of Koper.

The 30 MW solar power plant is more than just an energy project--it's a symbol of Slovenia's dedication to sustainable development. By investing in such a substantial solar facility, ...

Slovenia's largest solar power plant, covering approximately seven hectares, officially began commercial operations at the start of July. Located in the settlement of Krvavi Potok in the ...

Slovenia introduced a new tariff system in October, replacing peak and off-peak pricing with network charges that vary by time of day and season. Hojnik said the system targets active ...

The Government of Slovenia added three solar power projects to the development program through 2029. Eligible for grants from the Modernisation Fund, they are developed by hydropower ...

Slovenia has approved a spatial plan for its largest solar power plant, to be built by Dravska elektrarna Maribor across four municipalities with an initial 30 MW capacity.

The Ministry of Infrastructure is drafting a plan to install a new 1,000MW (1 GW) solar PV capacity in Slovenia with the support of the national transmission system operator (ELES) and the ...

Slovenia installed 85 MW of solar in the first half of 2025, driven by growth in commercial and industrial (C&I) projects and utility-scale installations. The lowest total in four years...

With a focus on advanced solar modules and a commitment to efficiency and affordability, it serves clients in Slovenia, Croatia, and Serbia, making it a key player in the solar energy sector.

Slovenia Commercial Solar Power System

Due to its favourable geographical location, Slovenia has a great potential for increasing its proportion of solar energy used. In 2020, a total of 11,990 solar power plants with a total electrical capacity of ...
