Italy's photovoltaic market is soaring past 40 GW in 2024. Discover the key drivers, government incentives, and future outlook for solar installations in Europe's second-largest market.

In 2024, Italy recorded a new peak with around seven gigawatts of new photovoltaic capacity. By 2030, the National Energy and Climate Plan calls for about 80 gigawatts to be installed ...

While Italy has made significant strides in solar PV installations, additional measures are needed to enhance financing, training programs, and public awareness. Additionally, improvements in grid ...

Find the most up-to-date statistics about the solar photovoltaic industry in Italy

The press release highlights a structural shift in Italy's energy landscape, with solar power becoming integral to the national energy mix. The surge in installations reflects growing ...

Italy's solar sector added 6.4 GW in 2025, reaching 43.5 GW total. Growth was driven by large-scale plants, offsetting declines in residential and commercial installations.

Key growth drivers include accelerating additions of distributed rooftop PV supported by net metering and simplified permitting, declines in PV system costs, and national targets to expand renewable ...

Solar power is an important contributor to electricity generation in Italy, accounting for 12.3% of total generation in 2023, and with a total installed capacity of 36.01 GW. [1][2] As of 2023, government ...

The country's cumulative installed PV capacity reached 43.5 GW at the end of December, according to the latest figures released by Italian grid operator Terna.

In 2024, Italy achieved its strongest year of solar growth in over a decade, installing 6.7 GW of new

# Solar Photovoltaic Power Generation in Italy

photovoltaic (PV) capacity and bringing cumulative capacity to 37 GW. PV generation reached 36 ...
