What is a capacitor (solar)?

The capacitor is the battery and holds the charge. It needs to be connected to the build to work. The Capacitor (Solar) must be used in conjunction with the Solar Panel Blocks to be effective. It stores electrical energy obtained and uses it for power. The maximum amount of these blocks allowed on a Base is 1.

What is a super capacitor?

For those of you who don't know much about super capacitors, here is a little bit of fun theory: Super capacitors act like any other kind of capacitor, only they can store tremendous amounts of energy. Many capacitors that you'd have seen in audio circuits have capacitances such as 470uf or 680uf (micro farads).
