Following the discovery of unknown communication devices in Chinese solar inverters, US energy authorities want to reassess their risk. During the investigation of inverters from China...

According to reports from sources close to ongoing investigations, experts examining imported solar inverters and battery systems from Chinese manufacturers have quietly found more of ...

U.S. energy officials are reassessing the risk posed by Chinese-made devices that play a critical role in renewable energy infrastructure after unexplained communication equipment was ...

Rogue communication devices have been found in some Chinese solar power inverters and batteries, two people familiar with the matter told Reuters, raising concerns of potential security...

U.S. energy officials are reviewing security risks posed by Chinese-made components in renewable energy systems after discovering hidden communication devices in some units, according ...

U.S. officials have discovered undisclosed communication devices on the power inverters of some Chinese-manufactured solar panels, Reuters reported today based on anonymous ...

Undocumented communication devices have been discovered inside solar inverters and batteries manufactured in China, according to two sources familiar with the ...

U.S. energy officials are reportedly reassessing the security risks posed by Chinese-made components in renewable energy infrastructure after discovering hidden communication ...

Power inverters, which are predominantly produced in China, are used throughout the world to connect solar

Solar container communication stations China assembles solar panels and thermal equipment

panels and wind turbines to electricity grids.

That has created a vulnerability that suddenly feels more real, as Reuters is reporting that experts have discovered hidden communications equipment in various Chinese-manufactured ...
