Elon Musk unveiled his futuristic hyperloop concept in 2013 by taking swipes at California's high-speed rail project, deriding it as 'a bullet train that is both one of the most expensive per mile and one of the ...

China unveiled a hydrogen-powered high-speed train that produces no planet-warming pollution. Even Texas, long a bastion of dirty-energy-dependent transit, has announced plans for a...

California's high-speed rail project will be powered entirely by solar energy, marking a significant step toward sustainable transportation.

Application of the existing infrastructures of railway stations and available land along rail lines for photovoltaic (PV) electricity generation has the potential to power high-speed bullet trains with renewable ...

The world's first solar power plant on a working rail line We're joining forces with Swiss start-up Sun-Ways to explore how movable solar power generation equipment can be installed ...

This project demonstrates how existing railway infrastructure can be optimized for solar power generation without requiring additional land use. Byron Bay Train in Australia, while smaller in ...

The proposed solar train in California is expected to be the world's first high-speed train running exclusively on solar power, covering a distance of 1,287 kilometers across the United States.

Solar panels capture sunlight and convert it into green electricity. The sleek and futuristic panels, assembled as canopies covering the HSR network, contain photovoltaic cells that absorb ...

As the California High-Speed Rail Authority gears up for this ambitious feat, its solar-powered trains will not only offer a sustainable alternative but will also achieve impressive speeds that promise to ...
